

## Centrifugal Fans Centrifugali ventilatori

fan|tastic solutions

23 rotavent fans have been chosen for the Museum Guggenheim at Bilbao. Noise level, energy consumption, and product quality have been the decisive criteria for this choice.

## The heart of a central air handling unit ...

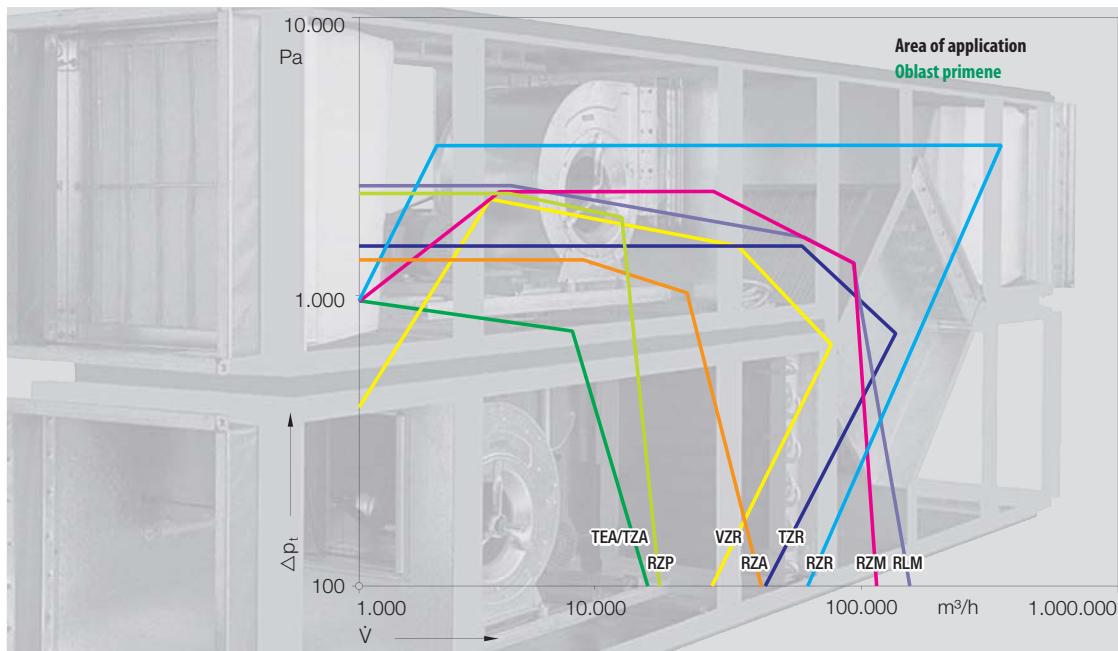

Nizak nivo buke, mala potrošnja energije, kao i kvalitet proizvoda bili su odlučujući kriterijumi prilikom izbora 23 rotavent ventilatora za potrebe Muzeja Guggenheim u Bilbao-u.

## Srce klima komore

Nowadays there is a great choice of different fan ranges available for everybody who has to select fans for an AHU. Every execution has been optimised to its strengths. GebhardtVentilatoren offers the opportunity to find just the right fan for every application.

**... everybody who selects a fan is responsible to make best use of the energy and to respect the admitted limits for noise emission.**

## Making the system work ...

### Example of fan designation RZR:

R	Z	R
<b>1</b>	<b>2</b>	<b>3</b>
<b>Centrifugal impeller with backward curved blades</b>		
<b>1 = Impeller</b>		
R - Centrifugal impeller <i>rotavent</i>	T - Impeller with forward curved blades	V - Centrifugal impeller <i>touravent</i>
<b>2 = Casing</b>		
Z - Double inlet	E - Single inlet	
<b>3 = Drive</b>		
R - Belt drive	A - Integral motor	P - EC motor
		M - IEC standard motor

## Ventilator omogućava funkcionisanje sistema

Danas postoji veliki izbor ventilatora različitih karakteristika namenjenih za ugradnju u klima komore, koji zadovoljavaju sve zahteve. Svaki tip ventilatora ima optimalne karakteristike. GebhardtVentilatoren nudi mogućnost izbora odgovarajućeg ventilatora za svaku primenu.

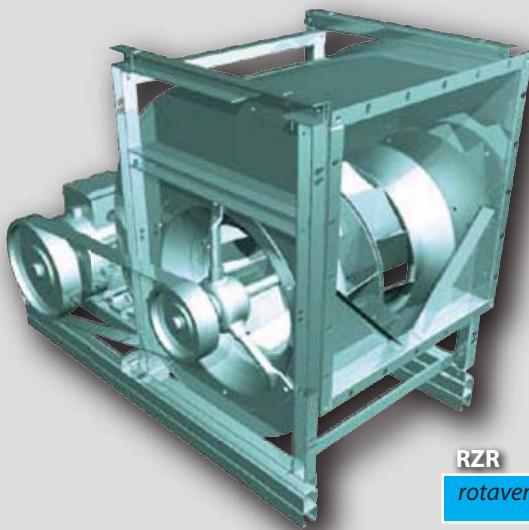

**...svako ko bira ventilatore odgovoran je za racionalno korišćenje energije uz poštovanje prihvatljivog nivoa buke.**

### Primer označavanja ventilatora RZR:

R	Z	R
<b>1</b>	<b>2</b>	<b>3</b>
<b>Centrifugalno radno kolo sa unazad zakrivljenim lopaticama</b>		
<b>1 = Radno kolo (rotor)</b>		
R - Centrifugalno radno kolo <i>rotavent</i>	T - Radno kolo sa unapred zakrivljenim lopaticama	V - Centrifugalno radno kolo <i>touravent</i>
<b>2 = Kućiste</b>		
Z - Dvostruki usis (duplex)	E - Jednostruki usis (simplex)	
<b>3 = Pogon</b>		
R - Kaišni pogon	A - Integrisani motor	P - EC motor
		M - IEC standardni motor

### Gebhardt rotavent – RZR

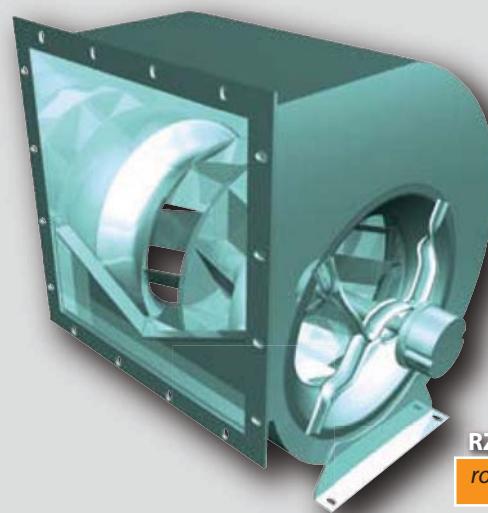

- Belt driven fan ranges up to size 1.600 (350.000 m<sup>3</sup>/h).
- Aerofoil blades supplying high pressure range.
- Easy adaptation to changing operating conditions.
- Unsensible to external aerodynamic influences.
- High efficiency and excellent noise characteristics.
- Suitable for flat belt drives.

RZR  
rotavent

### Gebhardt rotavent – RZA / RZP

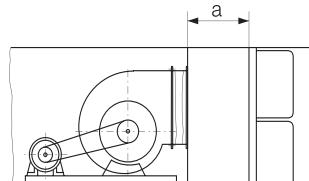

- Fan range with direct drive by integrated motor up to size 560 (35.000 m<sup>3</sup>/h).
- Most compact design.
- Economical use because of maintenance free operation.
- No dust generation, no subsequent filter necessary.
- 100% speed controlled at high efficiency values.
- Low slip technology means high motor efficiency.
- Suitable for frequency control.

RZA  
rotavent

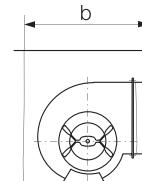

### Gebhardt rotavent – RZR

- Ventilatori sa kaišnim prenosom, veličine do 1 600 (350 000 m<sup>3</sup>/h).
- Aerodinamički oblikovane lopatice (aerofoil) za visoke pritiske.
- Lako prilagođavanje promenljivim uslovima eksploatacije.
- Neosetljivi na spoljašnje uslove strujanja.
- Visoka efikasnost i odlične karakteristike u pogledu buke.
- Pogodan za pogon pomoću ravnih kaiševa.

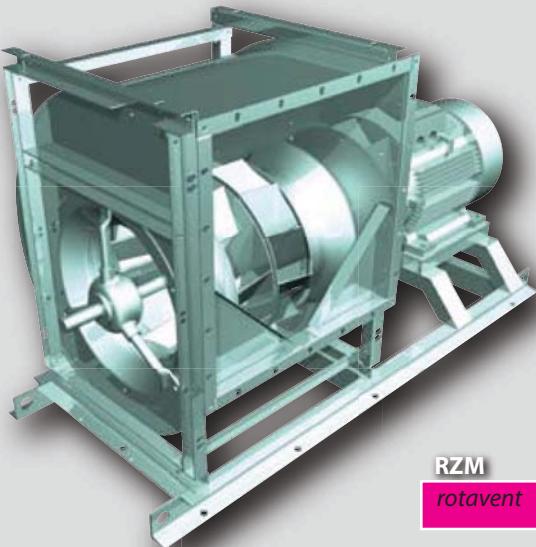

### Gebhardt rotavent – RZA / RZP

- Ventilatora sa direktnim pogonom pomoću integrisanog motora, veličine do 560 (35 000 m<sup>3</sup>/h).
- Izuzetno kompaktna konstrukcija.
- Ekonomična eksploatacija bez potrebe za održavanjem.
- Nema stvaranja prašine, pa nije potrebno filtriranje.
- 100% regulisanje brzine uz visoku efikasnost.
- “Low slip” tehnologija daje visoku efikasnost.
- Pogodan za primenu frekventnog regulatora.

### Gebhardt rotavent – RZM

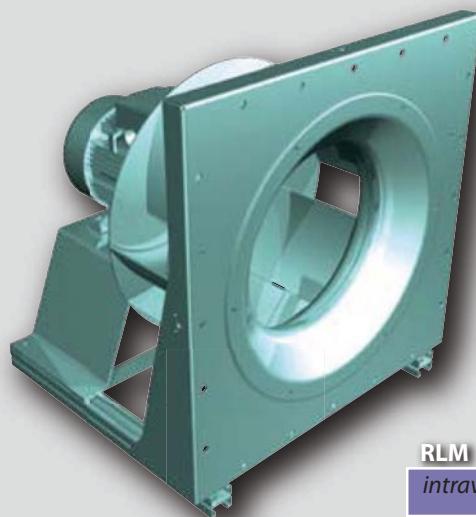

- Fan range with direct drive by IEC motor up to size 1.600 (200.000 m<sup>3</sup>/h).
- Direct drive covering higher performance range.
- IEC motor fitted on the side, control by frequency inverter.
- No belt drive losses, maintenance free.
- No dust generation, no subsequent filter necessary.
- All advantages of the famous rotavent design.

RZM  
rotavent

### Gebhardt intravent – RLM

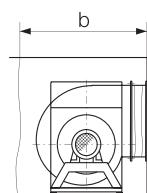

- Plug fan range with direct drive by IEC motor up to size 1.400 (130.000 m<sup>3</sup>/h).
- Single inlet fan for pressures up to 2000 Pa.
- Variable speed by inverter control.
- High efficiency even without casing.
- Reduced length.
- Multiple connection possibilities at pressure side.

RLM  
intravent

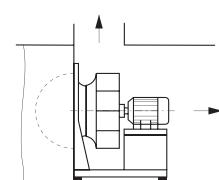

### Gebhardt rotavent – RZM

- Ventilator sa direktnim pogonom pomoću IEC motora, veličine do 1 600 (200 000 m<sup>3</sup>/h).
- Direktni pogon omogućava veći stepen korisnosti.
- IEC motor postavljen bočno, regulisan pomoću frekvencnog regulatora.
- Nema gubitaka usled kaišnog prenosa, nema potrebe za održavanjem.
- Nema stvaranja prašine, pa nije potrebno filtriranje.
- Sve prednosti poznate rotavent konstrukcije.

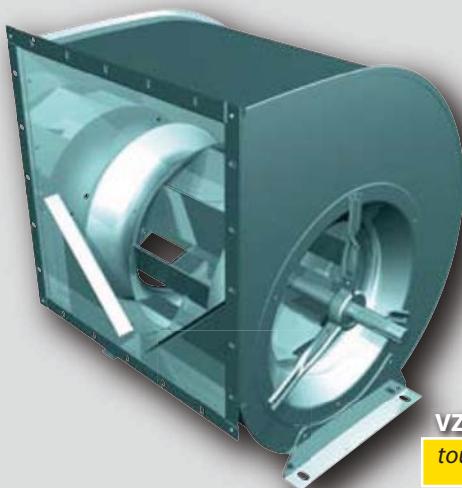

### Gebhardt intravent – RLM

- Ventilator bez kućišta direktno pogonjen IEC motorom, veličine do 1 400 (130 000 m<sup>3</sup>/h).
- Jednostruki usis za pritiske do 2000 Pa.
- Promenljiv broj obrtaja primenom frekvencnog regulatora.
- Visoka efikasnost čak i bez kućišta.
- Smanjeni gabariti ventilatora.
- Mogućnosti više priključaka na potisu.

### Gebhardt touravent – VZR

- Belt driven fan range up to size 710 (50.000 m<sup>3</sup>/h).
- Backward inclined laminar blades.
- Pressure range up to 2000 Pa.
- Economical solution by design and execution.
- Very good price/performance ratio.
- Stable operation over the whole fan curve range.
- Interesting element in combination with the full Gebhardt fan range.

VZR  
touravent

### Gebhardt teravent – TZR

- Belt driven fan range up to size 1000 (100.000 m<sup>3</sup>/h).
- Forward curved multiblade impeller.
- Available with brackets & flanges.
- Large flow rate within low pressure ranges.
- Low rotating speed.
- Low noise levels.

TZR  
teravent

### Gebhardt touravent – VZR

- Ventilator sa kaišnim prenosom, veličine do 710 (50 000 m<sup>3</sup>/h).
- Unazad nagnute lopatice.
- Napor do 2 000 Pa.
- Ekonomično konstruktivno rešenje
- Veoma dobar odnos cena/radne karakteristike.
- Stabilan rad duž cele radne krive ventilatora.
- Interesantan element u kombinaciji sa različitim tipovima ventilatora proizvodnje Gebhardt.

### Gebhardt teravent – TZR

- Ventilator sa kaišnim prenosom, veličine do 1 000 (100 000 m<sup>3</sup>/h).
- Radno kolo sa unapred zakrivljjenim lopaticama.
- Može se isporučiti sa nosećim ramom i prirubnicama.
- Veliki protok pri niskim pritiscima.
- Mali broj obrtaja.
- Nizak nivo buke.

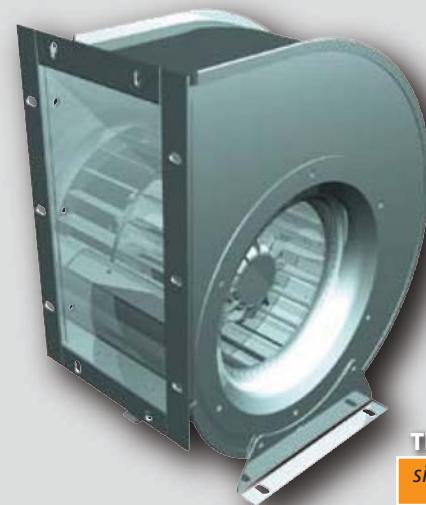

#### Gebhardt silentovent – TZA

- Double inlet, double width.
- Available for last 45 years.
- Operating hundreds of thousand units.
- Easy to install, easy to operate.
- Up to 10.000 m<sup>3</sup>/h.
- Single phase, 3-phase.
- 100% controlled by voltagevariation.

#### Gebhardt silentovent – TEA

- Single inlet, single width.
- Ultra flat and compact.
- Low noise, flexible use.
- Easy to install, easy to operate.
- Up to 4.000 m<sup>3</sup>/h.
- Single phase, 3-phase.
- 100% controlled by voltagevariation.

#### Gebhardt silentovent – TZA

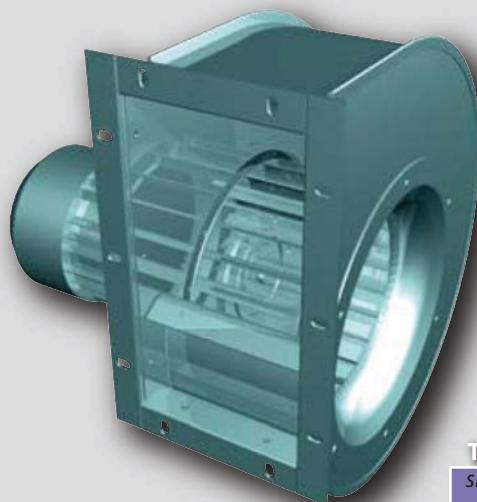

- Dvostruki usis, dupla širina.
- Proizvodi se već 45 godina.
- Ugrađen je u stotine hiljada uređaja.
- Laka montaža, jednostavno korišćenje.
- Protok do 10 000 m<sup>3</sup>/h.
- Monofazni, trofazni.
- 100% regulacija promenom napona.

#### Gebhardt silentovent – TEA

- Jednostruki usis, mala širina.
- Kompaktne konstrukcije.
- Nizak nivo buke, fleksibilan u radu.
- Laka montaža, jednostavno korišćenje.
- Protok do 4 000 m<sup>3</sup>/h.
- Monofazni, trofazni.
- 100% regulacija promenom napona.

### Gebhardt silentovent – TEM/REM

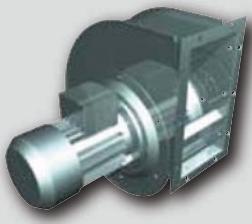

- Single, inlet, single width.
- Centrifugal fans – forward or back-  
ward curved impeller
- equipped with standard IEC  
motor.
- For integration or with brackets  
for duct connection.
- Up to 20.000 m<sup>3</sup>/h.
- Ex proof (ATEX) versions available.
- Speed control by inverter.

**TEM**  
*silentovent*

**REM**  
*rotavent*

### Gebhardt silentovent – TEM/REM

- Jednostruki usis.
- Centrifugalni ventilatori – radno  
kolo sa unapred ili unazad  
zakrivljenim lopaticama.
- Opremljen standardnim IEC  
motorom.
- Za ugradnju u uređaj ili za  
kanalsku ugradnju.
- Protok do 20.000 m<sup>3</sup>/h.
- Izrađuje se i u Ex zaštiti (ATEX), na  
zahtev
- Inverterska regulacija broja  
obrtaja.

The volumeter offers a simple and reliable possibility for checking or controlling the actual flow rate during operation.

Merilo protoka omogućava jednostavnu i pouzdanu proveru i regulaciju stvarnog protoka tokom eksploatacije.

## ... the integrated volumeter

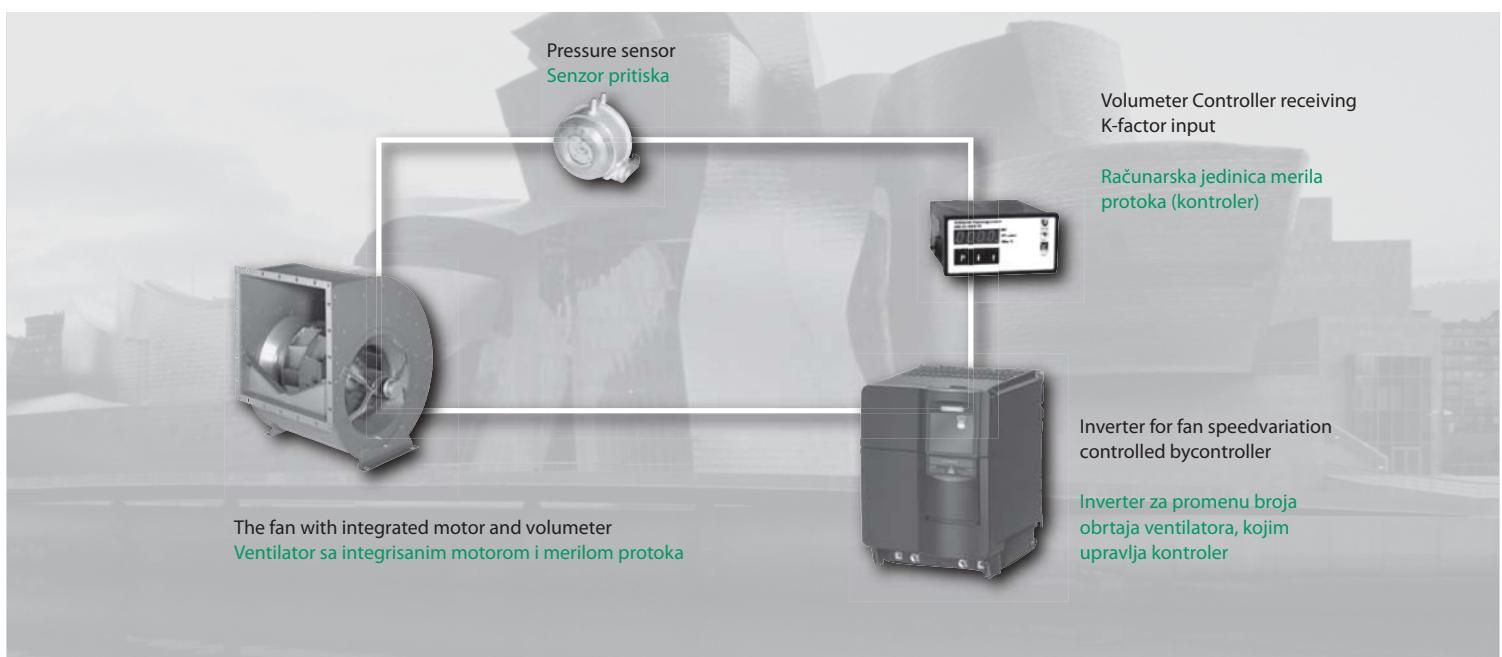

Flow rate check and control on the fan with the Gebhardt volumeter

- Easy
- Cheap
- Effective

## ... integrisano merilo protoka

Provera protoka kroz ventilator i njegovo regulisanje pomoću Gebhardt merila protoka (protokomera) je:

- jednostavno
- jeftino
- efikasno

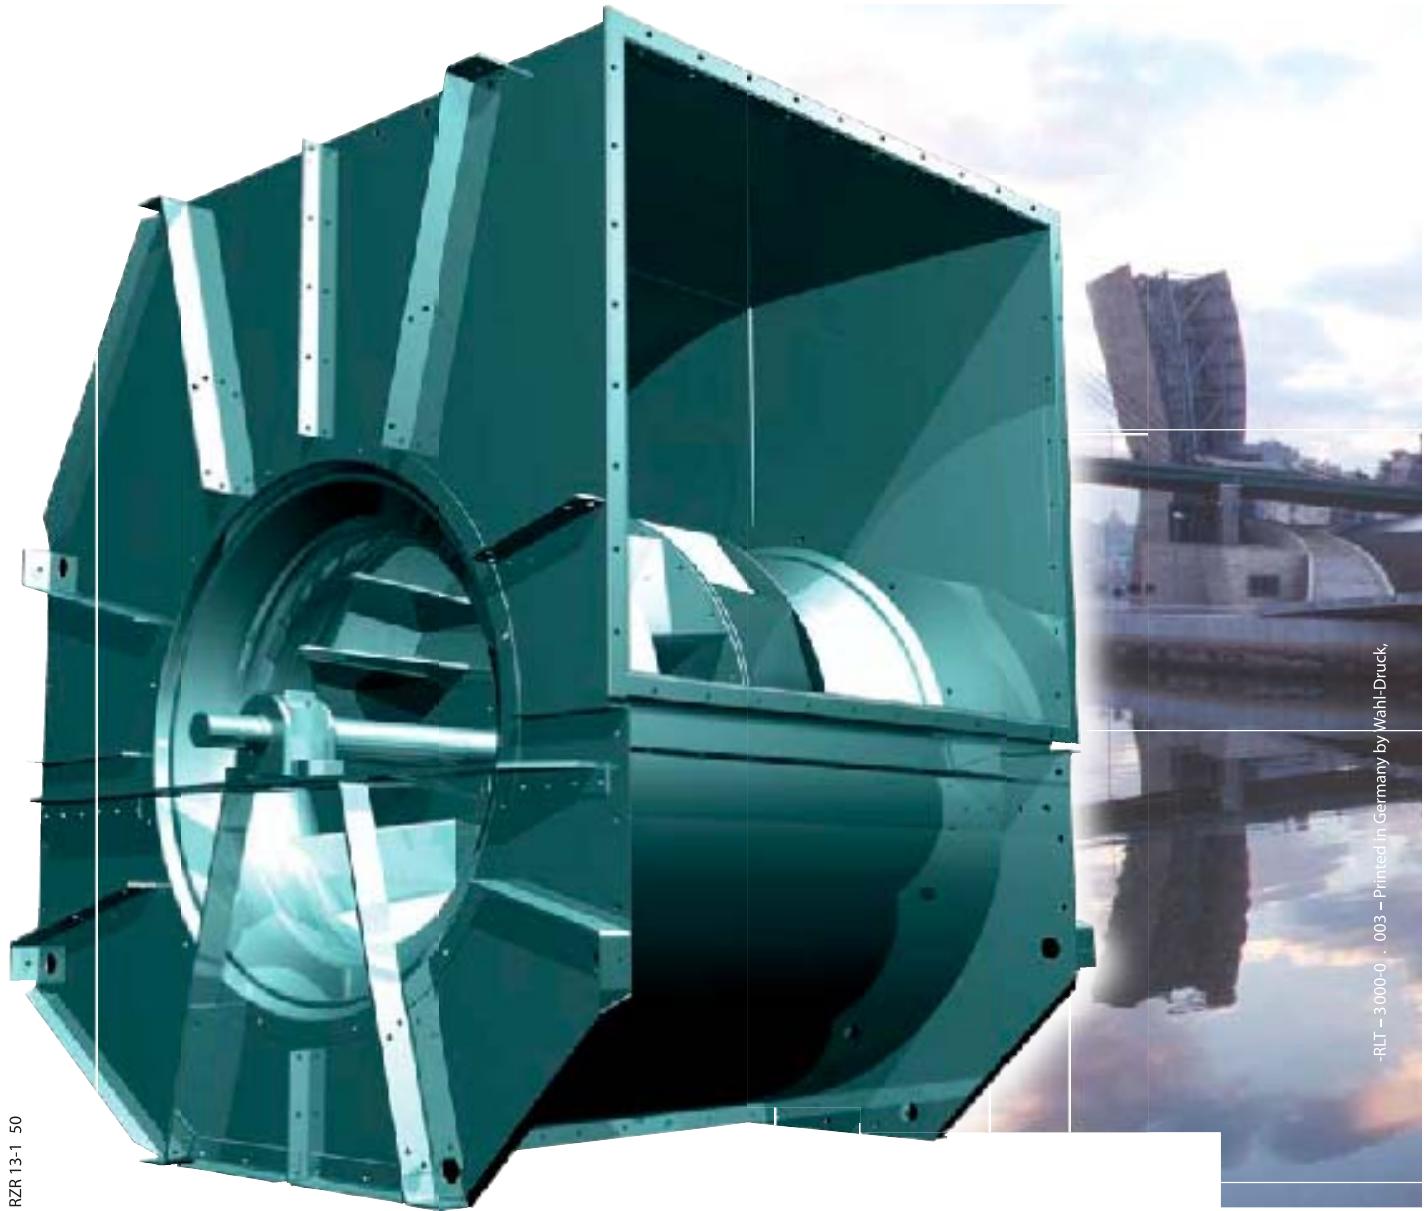

All technical data is supplied by the software **proSELECTA II**

- Simple
- Fast
- Reliable

Svi tehnički podaci se dobijaju pomoću softvera **ProSelecta++**  
- jednostavno  
- brzo  
- pouzdano

**This are the Gebhardt product ranges**

- Centrifugal fans
- Roof extract fans
- Axial fl w fans
- Process fans
- Smoke extract fans
- Domestic ventilation Bel Air
- Filter Fan Units
