

# NEW PLENUM BOXES ATTD AND ATTS

## KEY BENEFITS

- Low sound level
- Sound attenuation elements in ATTD also direct air flow
- Compact size, easy to install and handle
- Accurate and easy air flow measurement and adjustment
- For supply and exhaust use
- Includes a ZAEF measurement and adjustment damper that can be easily removed without changing the setting. ZAEF comes with a new small regulation handle.
- Duct connection sizes 100-315 mm, diffuser connection sizes 100-400 mm
- Tightness class C

**The new ATTD and ATTS are plenum boxes for all types of air diffusers and applicable for supply and exhaust alike.**

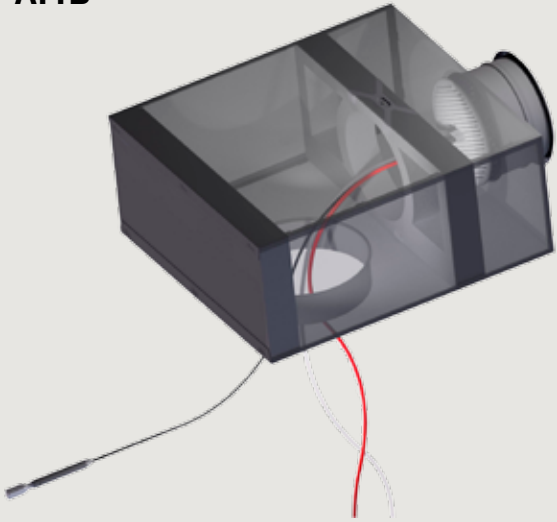

The new plenum boxes ATTD and ATTS have been completely redesigned. The external dimensions of the plenum boxes are more compact than before. ATTS is the smallest plenum box at the market and can be used even in extremely confined spaces. Thanks to the new production method there are no outward joints, which makes it very easy and convenient to handle and install the boxes. All models are equipped with effective sound attenuation elements as standard. Sound attenuation elements in the ATTD are also designed to direct the air flow in order to provide uniform air distribution.

## ATTD

- Replaces the old model ATTC
- Very low sound level
- Sound attenuation elements direct the air flow in order to provide uniform air distribution
- Measurement and adjustment damper ZAEF included
- Available with 1:2 (f.ex. 160:200 mm) and 1:3 (f.ex. 160:250) duct/diffuser connections.

## ATTS

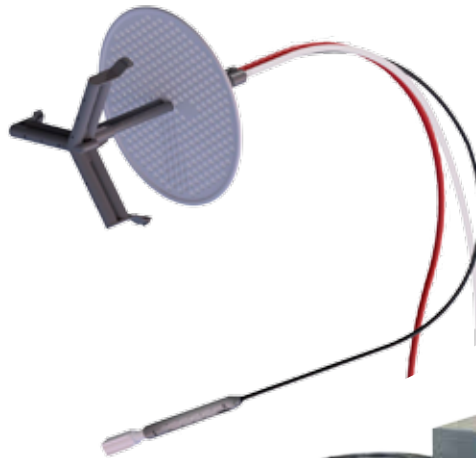

- Replaces the old model ATTN
- Low sound level
- Very compact dimensions, can be used even in extremely confined spaces
- Measurement and adjustment damper ZAEF included
- Available with 1:1 (f.ex. 200:200 mm) and 1:2 (f.ex. 160:200 mm) duct/diffuser connections.

## MEASUREMENT AND ADJUSTMENT DAMPER ZAEF

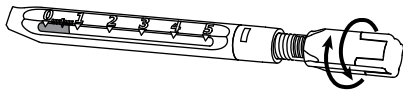

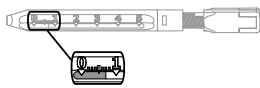

The new patented measurement and adjustment damper ZAEF enables balanced and accurate values. It can be easily removed without changing the setting.

The fast 3-way adjustment system includes fine adjustment, slide adjustment and locking. The adjustment position is easy to read and trace in the scale.

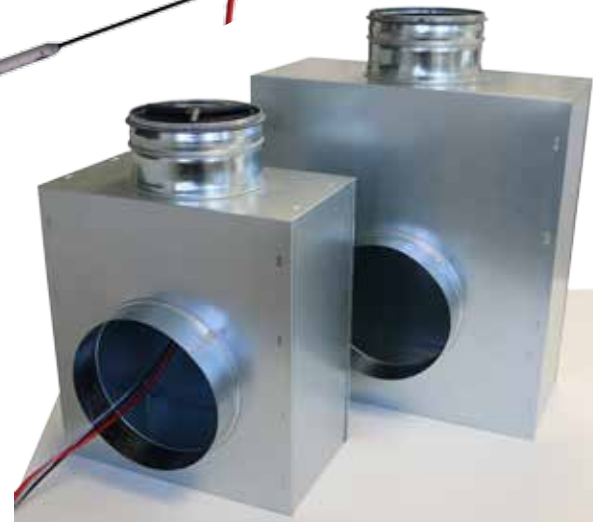

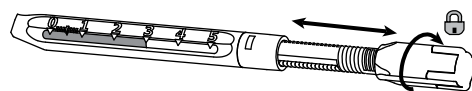

The redesigned adjustment handle is very compact in size for easy usability.
