HyFlex-Geko

HyFLEX-GEKO® FAN COIL UNIT

A NEW HIGH FOR FLEXIBILITY & COMFORT

BENEFITS OF HyFLEX-GEKO®

- 360° Flex Technology – ultra high flexibility solution
- From 1 kW up to 8 kW (Cooling and Heating)
- Optimised sound power level thanks to individual selection
- EC fan XT – Extended Technology
- External pressure up to 70 Pa
- VDI6022 – 2018/01
- Fast and easy selection
- Quick installation and easy maintenance

With the new HyFlex-Geko that is part of our innovative fan coil family we have created a new level of flexibility and performance. What was previously classified as great now defines a new high.

HyFlex-Geko definitely lives up to its name. High flexibility, high performance, hygiene, high speed selection, high speed installation and high speed maintenance are in every detail based on high customer orientation. A guided application-oriented selection based on technical requirements makes the design choice extremely fast.

FläktGroup®

HyFlex-Geko® – Easy and flexible

During the development of the HyFlex-Geko every single technical component has been optimised to maximise performance. We have also worked extremely hard on making every interaction with the product as easy and intuitive as possible – from selection to installation and maintenance. We believe it will make a significant difference all through the products life-cycle.

SAFETY

A hygienic solution to avoid bacteria growth in air conducting devices. Easy access for simple cleaning.

“PLUG AND PLAY”

Following the “plug-and-play” principle accessories for quick and easy installation are already pre-mounted at delivery.

HIGH PERFORMANCE

Pressure Independent valve control providing high performance and energy savings due to an automatic balanced system.

POWER

Efficient and quiet EC-fan with XT „eXtended Technology“; maintenance free magnet tape. Applicable up to 70 Pa external pressure drop.

EFFICIENT

Flexible piping connections for efficient space usage in your building.

LEFT/RIGHT 360° FLEXIBILITY

Possibility to turn the unit for changing the water connection side without having to order left/right units resulting in less needed installation time.

CONNECTIVITY

State-of-the-art ISYteq control with an excellent connectivity for easy commissioning, maintenance and operation.

EASY MOUNTING

Available drilling guide for easy and fast mounting.

EASY ACCESS

No need of big revision openings due to the folded filter with an easy filter change from the side.

ADAPTION

Flexible choice between preinstalled plenum with nozzles for easy installation or with pre-punched design for easy transport.

CUSTOMISATION

Suitable for every application due to wide range and high variety of accessories.
